

MONICA SILABAN

083834147721 | silabanmonica8@gmail.com | JL. Saudara Gg Sahata No 16A

I am an active student at the Del Institute of Technology, with a strong interest in web development and programming. I have a basic understanding of HTML, CSS, JavaScript, MySQL, C++, and Flutter, and I am proficient in using Microsoft Word, PowerPoint, and Excel. I am always enthusiastic about learning and continuously improving my technical skills. With knowledge in various programming languages such as C/C++, C#, Go, and JavaScript, as well as experience in developing web applications with PHP and Laravel, I am ready to explore a career in the field of information technology

EDUCATION

Del Institute of Technology

2022-Present

Diploma in Information Technology (IPK 3.46)

ORGANIZATIONAL EXPERIENCE

DECentral Campus Department

August 2023-Present

Member

- Actively participate in departmental meetings, record outcomes, and support follow-up actions.
- Support the planning and execution of departmental events, including logistical tasks and coordination.
- Handle internal communication among department members.
- Ensure the dissemination of the latest information and policies to department members.
- Collaborate with team members and relevant departments to enhance organizational operations.
- Execute additional tasks as per the department's and organization's needs.

TRAINING

BOOTCAMP REVOU

November 2023

Participant of the software engineer introduction training

- Actively participated in a 2-week online course organized by Revou.
- Engaged in practical exercises and assignments to grasp the direct application of the taught concepts.
- Understood the basic principles of software engineering through presentations and case studies.
- Learned several common programming languages and designed simple solutions.

TECHNICAL SKILLS

-
- **HTML:** Proficient in creating the basic structure and elements of HTML for simple web page development.
 - **CSS:** Possess a fundamental understanding of arranging layouts and visual styles using CSS to enhance the basic appearance of web pages.
 - **JavaScript:** Understand the basic concepts of using JavaScript to add some interactivity to web pages.
 - **MySQL:** Have a basic knowledge of designing and managing simple databases using MySQL.
 - **C/C++:** Understand the fundamental principles of C/C++ programming, with a focus on simple projects and basic memory management.
 - **C#:** Proficient in the C# programming language, used for developing Windows-based applications and other object-oriented software.
 - **Go:** Have a basic understanding of the Go programming language, commonly used for large-scale software development and web applications.
 - **Web Services:** Knowledgeable in web services development for creating applications that can communicate with other devices or applications over the internet.
 - **PHP:** Proficient in the PHP programming language, commonly used for dynamic web application development and database management.
 - **Laravel:** Experienced in using the Laravel framework for PHP-based web application development.

- **Flutter:** Capable of creating simple mobile applications using Flutter.
- **A.Net:** Proficient in using the .NET Framework, commonly used for desktop, web, and mobile application development in the Windows environment.
- **Kotlin:** Proficient in the Kotlin programming language, commonly used for Android application development.
- **Jetpack Compose:** Understanding of user interface development using Jetpack Compose in Android application development.
- **MS Word, MS PowerPoint, MS Excel:** Proficient in using Microsoft Word for document writing, PowerPoint for presentations, and Excel for data management tasks.

PERSONAL SKILLS & LANGUAGES

PERSONAL SKILLS: Detail-oriented, problem-solving ability, analytical skills, teamwork, adaptability, communicative, detail-oriented.

LANGUAGES: Indonesian (Native), English (Intermediate)
